

Cameron Wong

Data Scientist

Irvine, CA | (650) 443-8156 | cwong63014@gmail.com | [linkedin.com/in/camersonswong](https://www.linkedin.com/in/camersonswong) | camwong6.github.io

SUMMARY

Data scientist with a background in marketing analytics, player behavior modeling, and AI-powered data pipelines. Built ETL workflows and segmentation models on gaming datasets. Hands-on experience measuring campaign effectiveness through A/B testing and translating user-level signals into retention and monetization insights.

EDUCATION & CERTIFICATIONS

University of California, Irvine — Paul Merage School of Business

08/2026

Master of Science in Business Analytics

Irvine, CA

- Relevant Coursework: Machine Learning, Data Science Statistics, Deep Learning, Data Management, Agentic AI, Tech Consulting

University of San Francisco

08/2025

Bachelor of Science in Business Analytics

San Francisco, CA

- Relevant Coursework: Data Mining, Data Wrangling, Data Visualization

Certifications: Google Analytics | DataCamp: Intermediate Python, Intermediate R, SQL

EXPERIENCE

BLUE SHIELD OF CALIFORNIA (Graduate Capstone Project)

01/2026 – 06/2026

Competitive Intelligence Analyst

Long Beach, CA

- Built an ETL pipeline integrating web scraping and LLMs to ingest, transform, and validate 46,000+ text chunks from 90+ competitor SEC filings and earnings transcripts into a structured retrieval system.
- Designed an AI-powered query system enabling stakeholders to surface competitive insights on demand, reducing ad-hoc data requests to the analytics team.
- Applied NLP to correlate unstructured text signals with financial performance metrics, producing executive-ready narratives on competitive positioning.
- Collaborated with business and technical stakeholders to define data requirements and validate pipeline output quality across the full analytics workflow.

SAN FRANCISCO CHAMBER OF COMMERCE

02/2025 – 07/2025

Marketing Analyst Intern

San Francisco, CA

- Ran A/B tests on email campaigns using Constant Contact heatmaps, improving click-through rates 15% by translating behavioral data into content optimization decisions.
- Built targeted campaigns driving a 25% increase in event sign-ups; analyzed conversion data to identify high-performing audience segments and inform future send strategy.

SEVA FOUNDATION (Undergraduate Capstone Project)

01/2025 – 05/2025

Business Analyst, Project Lead

San Francisco, CA

- Cleaned multi-district survey and hospital records in Snowflake using SQL (window functions, DISTINCT, null filtering) to ensure data integrity across 50 years of program data.
- Built Power BI dashboards visualizing longitudinal trends in surgery volume, blindness prevalence, and financial performance for non-technical stakeholders.

PROJECTS

[Player Purchase & Engagement Analysis \(Valorant Dataset\)](#)

04/2026 – Present

Python · SQL · Power BI · RFM Analysis · Random Forest

- Engineered a unified analytical dataset from 100,000+ player records using multi-table SQL joins, merging account details and purchase history to model consumer spend behavior.
- Built RFM segmentation framework classifying players by recency, frequency, and monetization value, using it as an early player LTV signal to inform retention and re-engagement targeting.
- Developing a random forest model to identify the most impactful drivers of player spend, with findings to feed downstream monetization strategy recommendations.

ADDITIONAL INFORMATION

Technical: Python, SQL (Snowflake, BigQuery), R, NLP, Generative AI (LLMs), ETL Pipelines, Prompt Engineering, Web Scraping, Power BI, Tableau, Excel (Pivot Tables, Macros, VLOOKUP), Figma

Strengths: Marketing Measurement, Player Behavior Modeling, Data Storytelling, Cross-functional Collaboration, Adaptability
